

## **AMENDMENTS TO THE ABSTRACT**

Please replace the original abstract with the following rewritten abstract:

### **ABSTRACT**

A device for machining the flange part of a wheel arch, wherein a machining mechanism-~~(42)~~ ~~comprises~~ includes, as general-purpose drive parts, first to third cylinders-~~(66, 78, and 96)~~, and the work bending mold ~~(104)~~ for bending the flange part ~~(5)~~ of the wheel arch-~~(2)~~, work receiving mold-~~(94)~~, and work guide-~~(85)~~ of the machining mechanism-~~(42)~~ are replaceable with those of the other types. When a dedicated mold is replaced according to the shape of a work, the entire part of the machining mechanism-~~(42)~~ must not be replaced, but merely the work bending mold ~~(104)~~, work receiving mold-~~(94)~~ and work guide-~~(85)~~ may be replaced with those of the other types.
